

# All About Addition!

$1 + 1 = 2$

$2 + 2 = 4$

The **sum** of two groups of objects tells us how many objects there are in total. For example.:

$1 \text{ cat} + 1 \text{ cat} = 2 \text{ cats}$

For each problem below, add up the objects, then draw the total number of objects. Next, write out the problem using numbers.

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

For each addition problem, figure out the answer, then draw a line from the problem you've solved to the out-of-this-world picture with the same number of objects as your answer.

$$\begin{array}{r} 2 \\ +2 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ +1 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ +4 \\ \hline \end{array}$$

$$\begin{array}{r} 3 \\ +3 \\ \hline \end{array}$$
