Mathbooking Leap Year Journal Prompts

Yvonne Crawford

A Math Journal is a great way to promote your students' abilities to learn and grow through words, numbers and even drawing. Print and cut out as many prompts as you need for your students. Then, have your students paste them into their math journals.

Some prompts may only require a simple answer, while others will require more thinking and writing. Either way, encourage your students to write and draw out their thought processes.

Visit my site at www.mixminder.com for free worksheets and curriculum.

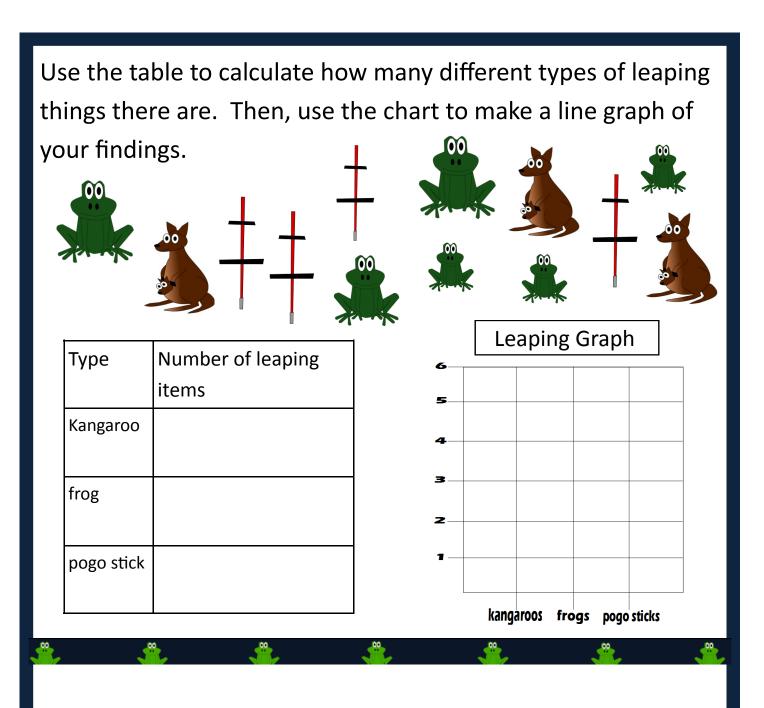

Gwen's birthday is February 29th. She keeps telling everyone she is only 3 years old since she's only had 3 birthdays that have fallen on February 29th. How old do you think she really is? Draw some pictures to help you figure out her true age.

Go outside and gather 30 leaves. Then, cut them into the shape of lily pads like the one on this page. Next paste them into your math journal in order to create a picture for this math problem: There are 14 lily pads. 8 lily pads float down the river. Then, 2 lily pads sink into the river. How many lily pads are left?
