

# Celebrate Diversity!

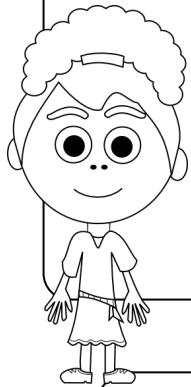

**Diversity** means that people are different; we are of different race, ethnicity, gender, age, and religion. We also have different interests. Interview the people in your classroom to discover how diverse your class is!

What different **languages** do the kids in your class speak?

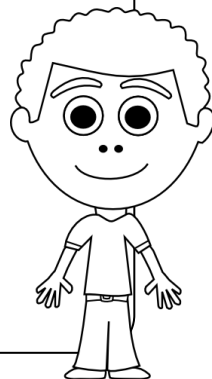

What **interests** do the kids in your class have? What do your classmates like to do in their spare time?

What different **religions** do your classmates practice with their families?

What different **countries** do your classmates, or your classmates' families, come from?

What **school subjects** do your classmates prefer? What do your classmates want to do when they are older?
